1. The NPL references crossed out in the IDS weren't received by the office.

**EXAMINER'S AMENDMENT**

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Amir A. Tabarrok on 5/26/2009.

The application has been amended as follows:

Change claim 5 line 3 to:

generating [[said]] an instruction, wherein a first meaning is associated with said

Change claim 5 line 15 to:

particular address from a memory unit and concatenating [[said]] a portion of said

Change claim 13 line 2 to:

a plurality of possible meanings associated with said particular instruction include  
an

**REASONS FOR ALLOWANCE**

3. The following is an examiner's statement of reasons for allowance:

4. Applicant argues "Examiner Petranek indicated that proposed claim elements of a first meaning is associated with said instruction stored at said corresponding address by a processor with a first bit position from said corresponding address concatenated with said instruction, and wherein a second meaning is associated with said instruction stored at said corresponding address by said processor with a plurality of bit positions from said corresponding address concatenated with said instruction, wherein at least one of said plurality of bit positions is different from said first bit position, as claimed overcomes Larsen by amendment" for claims 1, 5, and 10.

The examiner agrees for the following reasons. The examiner agrees that the amendment overcomes the Larsen reference. The Larsen reference teaches that three bits of an instruction's address can be concatenated onto the instruction to be used to associate two different meanings to a fetched instruction. The amendment requires that the concatenated bit positions are of different bit positions for the two different meanings associated with the fetched instruction. Larsen doesn't teach the newly claimed limitations because each of the first two meanings uses the same bit positions to determine the instruction's meaning. Thus, the amendment has overcome the Larsen reference and the rejection based on Larsen has been withdrawn.

Additionally, no new prior art has been found that reads upon the newly claimed limitations. Thus, the case is now considered allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jacob Petranek whose telephone number is 571-272-5988. The examiner can normally be reached on M-F 8:00-4:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Eddie Chan can be reached on (571) 272-4162. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
